

Mr. David Taylor
Chairman of the Board, President and Chief Executive Officer
Procter & Gamble
taylor.ds@pg.com

October 12, 2020

Dear Mr. Taylor

Re: Call on Procter & Gamble to ensure its use of Ontario's forests is more sustainable

On behalf of Ontario Nature, the David Suzuki Foundation and the over 3,000 individuals listed below, we ask that Procter & Gamble do its utmost to ensure that its use of Ontario's forests is more sustainable.

The Government of Ontario has been undertaking a massive deregulation campaign which is undermining the oversight, protection and citizen input for decisions impacting public lands in Ontario, including our forests. It wants to almost double the amount of forest currently logged in the province over the next decade, turning a blind eye to significant sustainability issues, such as the decline of boreal caribou, the loss of remaining old growth ecosystems (e.g., eastern hemlock), and the concerns raised by Indigenous communities regarding ongoing mercury pollution and glyphosate spraying.

We are concerned about the dual crises of climate change and biodiversity loss. Now is the time to protect more forests, waterways and wildlife, not to reduce government oversight over habitat fragmentation and destruction. We understand that our forests are important sources for products like toilet paper and other disposable paper products. However, Procter & Gamble has the corporate social responsibility to transition to more sustainable means of production, respect Indigenous rights and protect biodiversity.

We ask that you do the following:

- Require that the companies providing pulp for your products protect habitat for species at risk. For example, where forest tenures overlap with boreal caribou habitat, companies must ensure their operations meet or exceed the requirements stated in Canada's Boreal Caribou Recovery Strategy (2012, amended 2019). Currently, eight years after the Recovery Strategy was released, most do not.
- Require that the companies you purchase from adopt approaches to Free, Prior and Informed Consent with Indigenous communities as outlined in the United Nations Declaration on the Rights of Indigenous Peoples.
- Shift demand to recycled content for single-use pulp products by communicating those benefits with your customers to increase the amount of post-consumer recycled content. Reduce your need for new harvesting, particularly from primary (unlogged) forests, to provide pulp for your products.

- Source pulp only from forests that are Forest Stewardship Council certified. Additionally, require those companies to work with the Government of Ontario to permanently protect candidate protected areas as identified by that certification process.

Procter & Gamble is one of the largest purchasers of pulp from Ontario's forests. You have tremendous influence both in your marketing and your sourcing to help shift industrial logging in Ontario towards sustainability. We are looking to you to be part of the solution by protecting wildlife habitat and supporting Indigenous-led conservation initiatives. Will you show leadership on these issues?

Sincerely,

Julee Boan, PhD
Boreal Program Manager
Ontario Nature

Rachel Plotkin
Boreal Project Manager
David Suzuki Foundation
